Standards

- a. English Language Arts Standards English Language Arts Standards
 - i. Grades 9 10
 - 1. SL.9-10.1 Initiate and participate effectively in a range of collaborative discussions (one-on-one, in groups, and teacher-led) with diverse partners on grades 9–10 topics, texts, and issues, building on others' ideas and expressing their own clearly and persuasively
 - ii. Grades 11-12
 - 1. SL.11-12.1 Initiate and participate effectively in a range of collaborative discussions (one-on-one, in groups, and teacher-led) with diverse partners on grades 11–12 topics, texts, and issues, building on others' ideas and expressing their own clearly and persuasively
- b. Social Emotional Standards Social Emotional Learning Standards
 - i. Grade 9 -12
 - 1. A3: Demonstrate awareness of and willingness to seek help for self or others
 - a. 1.d Utilize support from trusted adults, as well as resources and agencies that provide academic, social, emotional or health-related support
 - 2. C1: Recognize, identify and empathize with the feelings and perspective of others
 - a. 1.d Evaluate verbal, behavioral, environmental and situational cues that may influence the feelings of others
 - 3. C2: Demonstrate consideration for and contribute to the well-being of the school, community and world
 - a. 4.d Evaluate the impact of personal involvement in an activity to improve school, home, community and world
 - 4. Apply positive verbal and non-verbal communication and social skills to interact effectively with others and in groups

Lesson Plan Info

Summary

This video is designed for you to use with your class to teach the ALICE strategies. This video includes "Stop & Do's." At each Stop & Do, pause the video to complete a training activity with your class.

You also have the following resources available in the portal:

- ALICE e-Learning for K-12
- Considerations for Students with Disabilities Module

Purpose

This video will teach age-appropriate ALICE strategies to students in grades 4 to 5. Please note, you know your students best. Feel free to adjust up or down a grade level to meet your students' needs.

Objectives

- Define the ALICE strategies.
- Know when to use the strategies.
- Practice the ALICE strategies during hands-on training.

Course Timing

This course will take approximately 45 minutes to complete (with activities). Feel free to split the training into mini-lessons as needed

Quick Guide

Grade Range	Training Concepts	ALICE Strategies	Product/Material
9-12	 Introduce the vocabulary and the strategies of the ALICE program. 	Alert Lockdown Inform Counter	Products: Basic Concepts of ALICE video with lesson plan booklet
	 Students participate in hands-on training and drills. 	Evacuate	Materials: • Detailed in lesson plan
	 Students learn to go to rally point. 		booklet
	 Students will learn control techniques. 		

Using this Lesson Plan

Icons

Use the following icons to guide you throughout this manual and the course.

Indicates portion of instructor lecture and discussion.

Pause presentation for hands-on group activity.

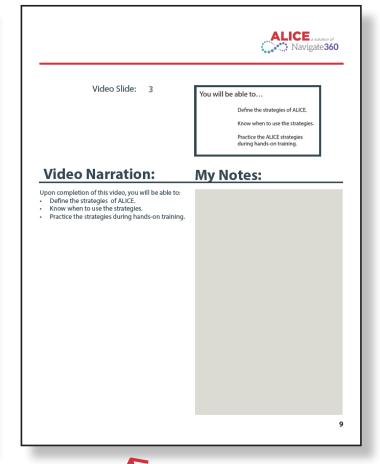

Pause presentation for discussion questions.

Page Guide

Each slide of the video has a page within this manual. There are two types of pages. Use the diagram below to assist you in navigating this manual.

Stop & Do pages will instruct you when to stop the video and perform the lesson.

Video Narration pages will show you what the narration is that goes with the portion of the video being played. There is also a section for you to put your own notes.

Video Narration: My Notes:

(Splash page music)

Basic Concepts of ALICE

Video Narration:

My Notes:

Welcome to the Basic Concepts of ALICE video. The purpose of ALICE training is to enhance your safety in the event of an intruder.

You will be able to...

Define the strategies of ALICE.

Know when to use the strategies.

Practice the ALICE strategies during hands-on training.

Video Narration:

My Notes:

Upon completion of this video, you will be able to:

- Define the strategies of ALICE.
- Know when to use the strategies.
- Practice the strategies during hands-on training.

Maximize your safety during an intruder event.

Preparation leads to peace of mind, confidence, and more successful outcomes.

Video Narration:

The ALICE strategies are broken into two categories: Awareness and Communication strategies and Response Options strategies. Awareness and Communication strategies include situational awareness, alert, and inform. The Response Options strategies include evacuate, lockdown, and counter.

You can use these strategies to maximize your safety during an intruder event.

Preparation leads to peace of mind, confidence, and more successful outcomes. Let's learn how we can prepare ourselves using the ALICE strategies.

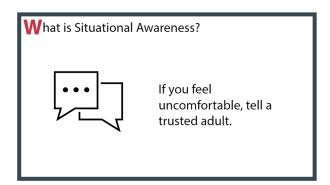

My Notes:

Your unique situation and location will determine which strategy you use. Let's discuss each strategy and how to use it.

Video Narration:

Situational awareness is being aware of what is going on around you. This means that you are paying attention to where you are and who is there with you. If you ever feel uncomfortable with your location or a person at your location tell a trusted adult why you feel this way.

Stop & Do

Objectives:

- To familiarize the students with situational awareness in a classroom environment
- To develop the students' observation skills in the classroom environment

Materials:

- Paper/pencil
- Tray with various home and school items
- Slide deck with photos of people
- Navigate360 video

Activity Outline:

Introduction:

Explain to the students that the portion of the video you just watched spoke about being aware of your surroundings. Tell them you are now going to practice increasing awareness of you surroundings.

Instruction:

Activity #1 - What's Missing

Provide a large tray with a variety of school and home based items for the students to study in small groups (2-3 students).

- Round 1: The group has one minute to observe the tray, noticing as many details as they can. At the end of the minute, the group must write down as many details about the tray as they can remember.
- Round 2: Have a nonplayer add some items, take some away, and move some things around. The players observe the tray again for one minute and at the end they write down what they noticed had changed.
- Round 3: Ask the students to identify what the nonplayer was wearing (as the nonplayer is now

Stop & Do (continued):

out of sight and most students were focused on only the tray).

Activity #2 - People Awareness

Show the students a slide deck with photos of random people and ask specific questions once the photo is off the screen.

For example:

- What was the girl wearing?
- Was she wearing a uniform? If so, what is it?
- What color hair did the girl have?
- Was the girl wearing glasses?
- Was the person on the bench outside the bathrooms a boy or girl?
- What did they look like? Describe.
- What were they wearing?
- What was the name on the name badge?

Activity #3 - Read the Room via Navigate360 Video Viewing

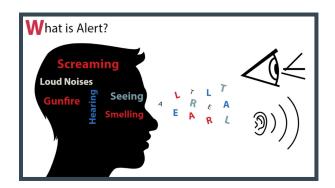

Show any of the Navigate360 videos and have a discussion with the students based on what they observed. We need to teach student how to READ THE ROOM - have an increased awareness in what is actually happening. This helps us know how to act and what to do. When we read the room, we are figuring out what is going on around us right now and that tells us how we should act.

Watch carefully and think about:

- What is everyone doing?
- What does each person have?
- Where are they?
- What time of day is it?

Discuss with the students their observations as a large group. Regular practice will sharpen the students' observation skills and ultimately their safety by having an increased awareness of what is happening.

Video Narration:

The alert is your first notification of danger. You receive an alert using your senses. For example, you could see the intruder, hear strange sounds, or see or hear information over the PA, phone, or other forms of communication.

Listen to these quotes from people involved in intruder events.

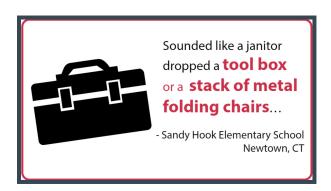

Video Narration:

My Notes:

"At first I thought it was a car backfiring. The next thing you know I hear all this pop, pop sound..."

Video Narration:

"I think approximately four minutes passed when I heard a very loud noise and I thought it had come from the hallway where the main office is located. I could not tell what the noise was, it sounded like a janitor dropped a tool box or a stack of metal folding chairs..."

Video Narration:

My Notes:

"The first time when I heard it, I thought it was just fireworks, or just joking..."

Video Narration:

Information empowers others to make decisions based on how to respond to what is happening. You will hear someone telling you where the intruder is and what the intruder is doing. Getting this information helps you decide what to do next.

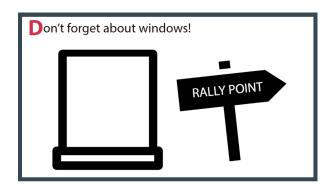

Video Narration:

Evacuation is the preferred strategy. If you know you can get out because of the information you have, go. Knowing where the exits are and practicing how to get to them is very important. Look for exits everywhere you go.

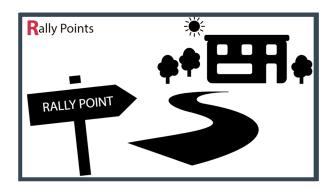

Video Narration:

Windows can be used as a way out if available. Know if your windows open, and if they do, how they open. Do they open all the way? If not, know you are empowered to break the windows to remove yourself from the situation. To break a window correctly, strike the window in the upper right-hand corner with a heavy object. Once the window is broken, clean out broken glass from the frame so you can get out safely. Once you get out of the building, move to your rally point.

Video Narration:

A rally point is a location away from your building that is close enough to run to but far enough for safety. Practice moving to this location with your teacher and classmates during drills.

Critical Thinking Opportunity:

Where is your rally point? Can your students explain how to get there? Engage students in a discussion about the rally point and how to get there.

Video Narration:

My Notes:

Let's watch as these students evacuate out of their classroom and the building.

How did they do?

Critical Thinking Opportunity:

Discuss how the students in the video did as they were evacuating.

Stop & Do

Objectives:

- The students will show where the exits are in their classroom.
- The students will discuss the correct way to break a window and exit.
- The students will demonstrate how to evacuate out of the building to the rally point.

Materials:

- Classroom normal set-up
- Rally point location

Activity Outline:

Introduction:

Explain to the students that the portion of the video you just watched spoke about knowing where your exits are and how to evacuate from the classroom. Tell them you are now going to discuss where exits are and how to get to the rally point.

Instruction:

Activity #1 - Where are our exits?

Where are our exits? Ask the students to look around the room and tell you where the exits in the room are. If you have windows, ensure the students understand they can be exits as well (if on the first or second floor).

What floor are you on?

Are the windows a good choice?

Where do the exits go?

Does it go back to the main hallway or connected rooms?

It is important the students know where the exits take them, especially if you have more than one.

Stop & Do (continued):

Activity #2 - Show how to open/break the window (if applicable) This is discussion only.

Show how to open/break the window (if applicable) Have the students show you how the windows open. If windows do not open, have the students point at the area to strike and break the window.

DO NOT break any windows. Discuss how they would get out of the window. If you are on a second floor, how would you get down?

Activity #3 - Going to the rally point

Have the students exit the classroom, then out of the building, and to the rally point. Ensure they are taking this activity seriously and there is no horseplay. Remember, the rally point needs to be far enough away for safety.

You can use your ALICE Certified Instructor or local law enforcement to assist you in this activity.

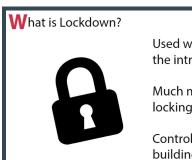

Guided Practice:

- Students discuss activity #1
- Students perform activity #2
- Students perform activity #3

Assessment:

- Students arrive at the rally point in a timely manner and without incident.
- Discuss how the activities went for the students, address any concerns.

Used when you know the intruder is nearby.

Much more than locking the door.

Control the door by building a barricade.

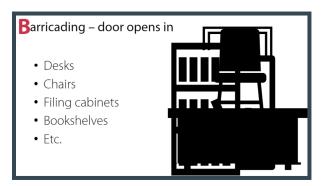

Video Narration:

Lockdown can be used when you know the intruder is nearby and you are not able to evacuate safely. You will need to control the door of the room. Start by locking it, but know this is not enough. Door locks alone have been defeated by intruders. Control the door by building a barricade. The type of barricade you build will depend on the way the door opens. Does it open in or does it open out?

Critical Thinking Opportunity:

Ask the students which way your classroom door opens. You will need this information when building your own barricade.

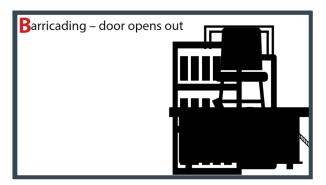

Video Narration:

Doors that open in are the easiest to barricade. Move heavy objects in front of the door to block it. Use objects like desks, chairs, filing cabinets, or bookshelves. Look around your classroom and find other objects you can use to block the door.

Critical Thinking Opportunity:

Ask the students to look around the classroom and say what they would use to barricade. Have a discussion on why the items they choose may or may not be useful in a barricade.

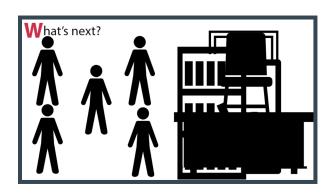

Video Narration:

Doors that open out can be just as easy to barricade but you must control the door handle before barricading with the cabinets, desks, chairs, and bookshelves.

Use an item like a belt or rope to tie around the handle of the door, then tie the belt or rope to a piece of furniture you placed along the frame of the door.

Video Narration:

Once you have controlled the door and barricaded, spread out - stand around the room away from doors and windows holding objects in your hand that can be used to distract the intruder.

Video Narration:

My Notes: Let's look at these students barricading the

classroom door.

How did they do?

Critical Thinking Opportunity:

Have a discussion on the video of the students barricading the classroom door.

Stop & Do

Objectives:

- The students will demonstrate how to barricade a door.
- The students will demonstrate how to spread out inside of the room prepared to counter or evacuate.

Materials:

- Classroom items to barricade (chairs, desks, book shelves, etc.)
- Belt or rope to control the door if it opens outward
- A device that can be used as a stopwatch for keeping time

Activity Outline:

Introduction:

Explain to the students that this will be a practice barricade so they will need to move at a controlled pace. Tell the students you are looking for quality, not speed, and there is nothing to prove to anyone.

Ask the students:

- What do we have in our room that can be used to barricade our door?
- How long should it take to barricade a door?
- What should we do after the door is barricaded?

Instruction

Tell the students that when you say "barricade" or "lockdown" (your choice), they will get out of their chairs and start to barricade - placing chairs, desks, and any other heavy items over to the door.

The first person to get to the door should ensure it is locked to start controlling the door.

Stop & Do (continued):

If the door opens out, place the belt or rope over the handle of the door to control it shut. Place a table, teacher desk, or student desk that is wider than the door frame on its side against the door frame. Tie the belt or rope hanging from the handle onto the leg of the table or desk good and tight. Stack more chairs and classroom items against the door.

If the door opens inward, start stacking desks, chairs, and anything heavy in the room against it.

Once the door is controlled, have the students spread out standing around the room away from doors and windows. Students will have items in their hands that can be used to disrupt the thoughts and actions of the attacker.

Guided Practice:

- Make the announcement "barricade" or "lockdown."
- Have the students perform the actions needed to barricade the door.
- Have the students spread out and be prepared to or evacuate.

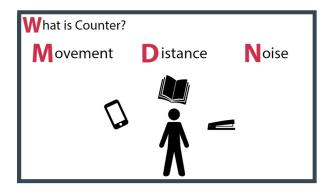

Assessment:

Have the students repeat the activity. This time, use a stopwatch to record how much time it takes to control the door. Tell the students they need to be careful while barricading even though they are being timed. Start the time when you give the announcement and end it when they feel they have accomplished controlling the door. Use the following assessment checklist to ensure students followed directions. Circle Acceptable or Unacceptable for each guestion.

Assessment Sheet for Lockdown Activity				
Did students lock the door first?	Acceptable	Unacceptable		
Did the students spread out and show preparedness?	Acceptable	Unacceptable		
Did the students follow directions?	Acceptable	Unacceptable		
Were the items in front of the door effective?	Acceptable	Unacceptable		
What was the total time to control the door?	Acceptable	Unacceptable		

Video Narration:

Counter is your ability to disrupt the intruder through movement, distance, and noise, or throwing stuff in the face of the intruder.

Performing these tasks can overwhelm the intruder's abilities and provide you time to evacuate.

Video Narration:

Countering gives you time and ability to perform other strategies. You may decide to evacuate away from the attacker or use the SWARM - controlling the body of the attacker by the five appendages. Two arms, two legs, and the head. You will need one person per appendage. Please note, SWARM is age appropriate.

Video Narration:

If the weapon is dropped by the attacker do not hold it in your hand. Place it in a trashcan or other bag so you are not a threat to responding law enforcement.

Video Narration:

Let's watch these students perform a counter strategy.

How did they do?

Critical Thinking Opportunity:

Discuss how the students in the video did while performing a counter strategy.

Stop & Do

Objectives:

- The students will demonstrate how stimulus delivered at the attacker can over task his brain.
- The students will demonstrate how to control the attacker (13 years of age and older).

Materials:

- Classroom normal set-up
- Your organization's ALICE Certified Instructor
- Presentation mouse with laser or a laser pointer
- "Moving Dot" PowerPoint slide

Activity Outline:

Introduction:

Explain to the students that the counter strategy is not about fighting and not about being a last resort. This strategy is to be used if the attacker is in the same room as yourself and there is no other strategy available at the time. The counter strategy can provide an opening to use another strategy like evacuation.

Remind the students that you just watched a segment of the video that discussed what should be done in order to disrupt the attacker's mental and physical actions. Tell them you are now going to practice how to disrupt the mental and physical actions of an attacker.

Activity #1 - Follow the Circle

Using a presentation mouse or laser pointer and the moving circle slide from the resources, have a student volunteer to do the demonstration. Give the student the laser pointer and have them

Stop & Do (continued):

point the laser pointer at the circle on the screen. The other students should be able to see the dot on the circle.

Tell the volunteer you would like them to follow the circle when it starts to move by keeping the laser on the circle. The rest of the class should follow the circle with their fingers.

Ask if the volunteer is ready, then click the play button on the screen.

The students will notice the volunteer's laser is always behind the circle. This is because action is faster than reaction. The volunteer is reacting to the movements of the circle. According to Force Science, reacting to an unexpected stimulus takes about 1.5 to 1.6 seconds. This is twice as long for a person reacting to an expected stimulus. (0.7 to 0.8 seconds).

Outcome: The volunteer's laser will be slow and behind the circle, showing that trying to be accurate with a moving object is difficult.

Activity #2 - Discussion

Discuss how you would counter an intruder in the classroom.

ALERT

LOCKDOWN

INFORM

Use the new skills you learned if faced with an

COUNTER

intruder situation.

EVACUATE

Video Narration:

My Notes:

Remember, the ALICE program is based on strategies to enhance your safety in an intruder situation. Use the new skills you learned if faced with this type of situation.

Video Narration:

My Notes:

Thank you for watching the Basic Concepts of ALICE video.

Vocabulary Words

Barricade - block entry to area

Counter – to oppose the intruder; your ability to disrupt the attacker's actions, this provides time and ability to perform another strategy

Dangerous – likely to cause harm

Evacuate – leave the area

Intruder – someone who enters the school environment who does not belong

Lockdown - no one can enter or leave their current location/area

Rally Point – our meeting area outside the school building

Safe – free from harm

SWARM – controlling the intruder by the five appendages (two arms, two legs, and the head)

Assessment

Matching of the vocabulary words with definitions.

Define lockdown for our classroom.

How can the classroom door be controlled, more than locked?

Describe how we barricade the classroom door.

Identify three classroom items that can be used to counter an intruder.

What is the main goal of countering the intruder?

Where is our classroom's rally point?

When should we evacuate the building?

Describe a time when you feel safe.

If we need to break a window to evacuate the classroom where's the window's weak spot?

When do we choose to conduct a SWARM on an intruder?

How do we SWARM an intruder?

What should others do while a SWARM is in progress?
